About me

I'm a Business Innovation graduate. Alongside my studies, I supported organizations in client success, video production for marketing, and research-driven innovation. I thrive in high-performance teams working toward a shared goal. Understanding how systems work, then finding practical ways to strengthen them, is how I love to work.

My foundation as an outdoor sports instructor still shapes how I work today: staying focused under pressure, reading situations quickly, and taking confident action when it matters.

Alongside my professional career, I run a freelance production company where I help clients, from brands to individuals, communicate their message effectively through video and AI-generated content. This work has deepened my skills in storytelling, client communication, and translating complex ideas into clear visuals.

WORK EXPERIENCE

L'exist productions
2022 - present

Freelance Videographer & AI Content Specialist

- End-to-end video production for B2B brands and events, including explainer videos, interview content and social media campaigns
